

Directional Control Valves

Composite Solenoid Valve, 2 & 3-Way
Normally Closed or Normally Open

Series 38MP

The Series 38MP is a 3 or 2 way, 2 position composite body solenoid valve designed to take the place of a fitting using a female inlet and male outlet port. The valve is generally mounted into an air cylinder port to control a single acting linear actuator. Component features include the proven solenoid operator available in brass/stainless or all stain-

less pilot design, optional seal materials and nylon encapsulated coil. The “basket” orifice design feature allows the possibility of changing the orifice diameter to meet flow requirements.

The DuPont Zytel FE 5015, FDA approved composite material is media compatible eliminating the need for stocking multiple body materials.

Dimensional Data

Features

- Composite material
- Chemical compatibility
- FDA approved versions
- 7 orifice sizes
- Easily replaceable orifice
- Vacuum holding & flow applications
- Pressure to 270 psi
- DIN spades or flying leads

Directional Control Valves *Composite Solenoid Valve, 2 & 3-Way* **Series 3853** Normally Closed or Normally Open

The Series 3853 is a composite body solenoid valve offered in both 2-way and 3-way normally open or closed functions and seven orifice sizes. Component features include the proven solenoid operator available in brass/stainless or all stainless pilot design, optional seal materials and nylon encapsulated coil. The "basket" ori-

fice design feature allows the possibility of changing the orifice diameter to meet flow requirements.

The DuPont Zytel FE 5105, FDA approved composite material is media compatible eliminating the need for stocking multiple body materials.

The 3953 contains all the features of the Series 3853 but can be stacked into a multiple output bank of solenoid valves. The Series 3953 features a fully encapsulated coil, spring compensated plunger seats for long life and a miniature stackable composite valve body. The advantage to this design is the versatility to stock single units

and build, mix and match to meet specifications. In most cases the Series 3953 reduces inventory costs and lowers cost per installation over conventional manifold valve series. The coils are available with DIN quick connect pin out or flying leads.

2-Way, 2-Position normally closed/open Process Solenoid Valves

The Series 3500 2-way, 2-position Solenoid valve uses the latest combinations of technologies for materials and function which provide the user with the highest quality, smallest size per Cv of flow and most competitive pricing of any valve on the market. The 3500 utilizes the latest injection molding and forging technologies available which combined garner the highest quality yields of components. When coupled with the solenoid operator and used as a direct acting/pilot operated valve, the 3500 gives full flow throughout the pressure range starting

with an MOPD of zero psi. The forged body section gives strength and robustness to the valve and is available in 1/4", 3/8" and 1/2" NPT sizes. The orifice for all sizes is 12.5mm or 1/2". The molded pilot section features a push non-locking manual override, high cycle life solenoid parts and quick connect DIN 43650 "A" electrical connection. Typical applications include air control, inert gas control, water, inert fluids, condensate drainage, hot water plumbing and sprinkler systems.

Technical Data

MAX. PRESSURE RANGE

Principle of Operation

Closed Position

With no supply pressure and the valve de-energized, spring force from the armature holds the valve closed. As the supply pressure is increased, pressure builds up on top of the diaphragm via the bleed hole. This force, acting on the larger effective area, holds the valve closed (in conjunction with the armature spring).

Open Position

When energized with no supply pressure, the armature lifts allowing the pre-loaded diaphragm to lift, opening the valve. When supply pressure is applied, pressure above the diaphragm is relieved via the open pilot gallery. The fluid pressure below assists in holding the diaphragm open.

2-Way, 2-Position Process Composite Solenoid Valves

The Series 3510 2-way, 2-position Solenoid valve uses the latest technologies for materials and function which provide the user with the highest quality, smallest size per Cv of flow and most competitive pricing of any valve on the market. The 3510 utilizes the latest injection molding technologies available which make the 3510 compatible with many fluids and other media. When coupled with the solenoid operator and used as a direct acting/pilot operated valve, the 3510 gives full flow throughout the pressure range starting with an MOPD of zero

psi. The polymer body section is available in 1/4", 3/8" and 1/2" NPT sizes and features a stainless steel anti-flex ring for port strength. The orifice for all sizes is 12.5mm or 1/2". The molded pilot section features a push non-locking manual override, high cycle life solenoid parts and quick connect DIN 43650 "A" electrical connection. Typical applications include air control, inert gas control, potable water (NSF versions), condensate drainage, hot water plumbing and sprinkler systems.

1/4 NPT & 3/8 NPT Ported, Manual & Pilot Operated, & Solenoid Controlled Air Valves

New 5 Ported, 3-Position 4-Way Operation

New Spools for 14 & 34 Series Air Valves

4-Way - 5 Ported - 3 Position - Type B
"Blocked"

Center position - All ports blocked and isolated. Use on conventional block and hold circuits.

4-Way - 5 Ported - 3 Position - Type F
"Float"

Center position - Inlet blocked
Cylinders open to exhaust
Used to vent both ends of cylinder to allow cylinder to float with a manual or machine movement. Flow controls or exhaust speed controls should not be used.

1/4 NPT & 3/8 NPT Ported, Pilot Operated Air Valves

5 Ported, 3-Position 4-Way Operation

Model 14-DPB Shown

Features

- Aluminum bar body
- Anodized black
- Honed and burnished bore
- Delrin spool, Pressure balanced
- Buna N seals
- May be used as either
single inlet-dual exhaust or
dual inlet-single exhaust
- Pre-lubed with Magnalube-G® grease

Operating Range

- Operating Pressure 0 to 150 psi
- Minimum Pilot Pressure 50 psi
- Temperature 0° to 180°F
- Cv = 1.0 (56.2 SCFM free flow to atmosphere @ 80 psi supply)

.25" quick-connect terminals

Stocked Voltages:

24, 120 and 240 Volt at 50 or 60 Hertz

12 and 24 Volt DC

Temperature Range: 0° to +180°F

(–18° to +82.2°C) including ambient

Typical response times:

AC 4 to 8 milliseconds to open or close

DC 9 to 15 milliseconds to open

DC 5 to 12 milliseconds to close

Options for 53 Style Solenoids

for Conduit Housing "C" and Grommet Housing "G"

• AC Voltages from 5.4 to 575 in 50 or 60 Hertz

• DC Voltages from 3 to 300

• Molded Coil, Option -M

Water tight molded coil with

Class A 221°F (105°C) Rating.

Coil completely molded in epoxy
for maximum moisture resistance.

NEMA 1, 2, and 3 when in
Conduit "C" or Grommet "G" housing.

• Potted Coil Option -P

Coil is epoxy potted into conduit
for "C" housing only.

It offers maximum moisture and
vibration resistance.

NEMA 3R, 3S, 4, 4X, 6, 11, 12, 13

• High temperature Option -H

Molded coil with 356°F (180°C) rating

• Viton Seals Option -V (–15° to +400°F)

• Strain Relief Connector Option -Q

• "AN" Connector Option -W

• Splice Box Option -J

• Mounting Bracket Option -R

• Third Wire Ground Option -CC

A CSA requirement

• Yoke with standard coil, Option -YB

• Yoke with molded coil, Option -YM

• Yoke with molded spade terminal coil,
Option -KM

Yoke replaces housing for protected and
control box applications.

Molded coil with two .25" spade terminals for
quick assembly and disconnect.

• Explosion Proof Option -EP

UL File #E37780

CSA File #LR-26894

for hazardous locations

includes molded coil

UL Class I Groups C & D

UL Class II Groups E, F & G

NEMA 7C, 7D, 8C, 8D, 9E, 9F & 9G

Options for 53 Style Solenoids

for Male Mini-DIN Housing "F"

• Viton Seals Option -V (–15° to +400°F)

53 Style Solenoid Operators

Standard 53 Style Operator

The solenoid operator is a 3-way NC valve which, upon receiving an electrical signal, directs pressure to shift the main valve spool. As standard, the operator is internally supplied with air pressure from the main valve inlet.

53 Style Operator with External Pilot Option -X

In the following listed applications, as well as many others, a proper air supply may not be available from the main valve inlet. For these applications, an external pilot supply port is available (Option -X). A proper air supply to this port then supplies the solenoid with air pressure for piloting the main valve spool.

- Dual inlet, single exhaust
- Insufficient Pressure at main valve inlet
- Media at main valve inlet is other than air
- Extreme fast cycling

Conduit Housing "C"

Housing can rotate 360°

Grommet Housing "G"

Housing can rotate 360°

Valve Dimensions

Male Mini-DIN Housing "F"

Connectors for DIN Spades (11 mm centers):

P/N 122-09-N
Black housing - No LED

P/N 122-09-T-A.1-Voltage
Transparent housing and LED

Fabco-Air Product Catalog Library

Cylinders, Valves & Accessories Cat. CV9
 Describes Pancake®, Square 1®, Longstroke™, Multi-Power®, and HiPower™, cylinder lines. Also details valves, air-over-oil tanks, boosters and accessories.

See catalog #CV9 for other valve models not shown in this bulletin

Pneumatic Grippers Catalog GR-8

• SPG & LPG parallel jaw motion with strokes from 1/4" to 24" & forces to 402 lbs. • GR & GS angular jaw styles with on-the-fly adjustment.

New Linear Thrusters Bulletin GB-JA02

Features longer strokes to 10" – and 4mm round profile sensors with surge suppression and polarity protection.

Multi-Power® Air Presses Catalog FP16

Details the powerful line of precision, force-multiplying air presses. Deliver forces to 11,000 pounds.

Swing Clamps Bulletin #SC-DB04

Clamp arm rotates 90° as it extends away from the workpiece. Features standard magnetic piston.

Stainless Steel Body Air Cylinders Catalog SSB-03

Exact interchange in bores from 5/16" to 3", strokes to 32". Popular options includes magnetic piston, non-rotating, and position feedback.

Dual Function Slides Bulletin EDF-10

Either of two slide styles (gantry or thruster) can be made from a single set of parts. Users can inventory less parts and assemble styles as needed.

Stopper Cylinders Bulletin #ST-DIX04

Standard magnetic piston and a wide selection of styles. Roller direction is adjustable. Magnetic sensors can be mounted on body.

Pancake® II Cylinders Catalog Pan2-2

The direct industrial interchange. High strength composite cylinder barrel. 4 popular styles: Standard, Nonrotating, Multi-Power® and 3-position.

Global Series™ Air Cylinders Cat. GC-15

Widest choice of models and options. Features non-lube service to 150 psi. Bores 12mm to 100mm
 • Strokes 5mm - 150mm
 • NPT or Metric ports

Linear Slides Catalog LS-03

Line includes 6 families of slides, pick & place units, and thin parts placers. 5/16" to 4" bores. Guide shafts 1/4" to 1-1/2".

NFPA Interchangeable Air Cylinders Catalog NF-6

All the desirable NFPA mounts. Bores from 1-1/2" to 6"; strokes to 99". Aluminum or high strength composite cylinder body. Magnetic position sensing.
